What nutrients does Meology Prenatal provide?

Meology Prenatal was carefully formulated to support the core nutritional needs of pregnant, breastfeeding, and pumping women based on daily value requirements and recommendations by the American College of Obstetricians and Gynecologists.

The core products in Meology Prenatal (Prenatal MultiV Drink, MultiM Tablet, Omega-3 Gellys), deliver 23 essential vitamins and minerals, including 100% or more of the daily value of 20+ vitamins and minerals. They also deliver 300 mg of omega-3s, including 250 mg DHA and 50 mg EPA, plus 225 mg choline.

Why aren't all vitamins and minerals delivered in the Prenatal MultiV Drink?

Because some minerals can have a distinctive taste, we designed a way to deliver the core nutrition you need in an innovative two-part regimen that keeps our Prenatal MultiV drink mix tasting great. When taken together, our Prenatal MultiV Drink and MultiM Tablet deliver 23 essential vitamins and minerals, including 100% or more of the DV of 20+ essential vitamins and minerals, plus 225 mg choline.

Why does the Meology Prenatal Program use folate rather than methylfolate?

Methylfolate has been proposed as an alternative supplemental folate form, especially for people with MTHFR gene mutation. However, there is no clear evidence or recommendation by authorities that people with a MTHFR mutation should take methyl folate.

For more information, please go to <https://healthresource.shaklee.com/?s=methylfolate>

When should I take my Meology Prenatal supplements?

We recommend you take your supplements with food. It might be easier to remember if you take them at the same time each day, for example, with breakfast.

Do the products in the Meology Prenatal Vitamin Packs have an expiration date?

We recommend that the products in the Meology Prenatal Vitamin Packs be consumed within 60 days of receipt.

I have a food allergy or specific dietary preference. How do I know if any of the recommended products contain ingredients I should or want to avoid?

On the recommendation page, just below each product description, you can find indicator icons for all relevant product attributes. We always recommend that you consult your physician if you have any specific concerns regarding which products are appropriate for you.
